

Mexico Energy Intelligence®

Subscription services and rate plans

OUR REPORTING AND DOCUMENTATION SERVICE helps subscribers anticipate the outcomes of evolving legal, policy, institutional and commercial conditions in Mexico’s energy sector. We accomplish this goal by staying at the interface between commerce, institutions and public oversight (Fig. 1).

Subscribers are IOCs, NOCs, pipeline companies, regulators, law firms and university libraries and research programs.

We help subscribers guard against making errors in their planning for policy and business development (Fig. 2).

Fig. 2
Uncertain commercial outlook
Which way to you want to be wrong?

- **Type I Error in Statistics: False Positive**
 - The patient has cancer *when he doesn't*.
 - The 2013 Energy Reform will soon provide new commercial opportunities *when it won't*.
- **Type II Error in Statistics: False Negative.**
 - The patient is free from cancer *when he isn't*.
 - The 2013 Energy Reform will not soon provide new commercial opportunities *when it will*.

We also help subscribers dig into official documentation by providing reformatted documents with bookmarks in English and indices of key words, laws and institutions.

We offer subscribers several ways to project their values and presence in policy circles and the marketplace, as by interviews posted on our website, <http://www.energia.com>.

Accountability
rendición de cuentas, 1, 16
Anti-corruption
actos u omisiones contrarios a la ley, 16
Article 27
párrafo séptimo, 1, 3, 4, 5, 6, 7, 10, 11, 15
párrafos sexto y séptimo, 1, 3
Article 28
No constituirán monopolios, 3
párrafo cuarto, 1, 2
CFE
Comisión Federal de Electricidad, 4,
Extract 1 - from 2013 Energy Reform

Subscribers, in turn, support us, financially and intellectually, in our work to project a vision of an energy regime in Mexico that is globally connected—which, at present, it isn’t—and with strong public oversight and an NOC that can operate outside of Mexico in equity partnerships. We project this vision in our subscriber reports, public-interest papers on our website, social media, press interviews and conferences.

Finally, we offer subscriber organizations an introductory workshop for energy professionals on the fine points of English and Spanish phonology. In 2013, the English workshop was held in Mexico City, Villahermosa and Poza Rica.

Subscription rate plans

Normally, reports and documentation are sent to individual users on a subscriber’s distribution list; alternatively, a subscriber may request that communications be channeled through just one person. Previously published reports are available at a discount to subscribers, either as an individual purchase or in blocks.

	Annual	Users	Add'l user
Oil & Power Industries*	\$15,000	10	250
Other Industries*	6,000	4	250
Mexican government	10,000	15	250
Law firm/NGO	1,800	4	250
Embassy/University	500	5	150
Student/Retired†	180	1	-

We offer rate plans for several classes of subscribers (see table).

*Semi-annual billing available
†Scholarships available
